The accelerating adoption of Learning and Employment Records (LERs)/Wallets adds thousands of Wallet Holders to the Skills Talent Pipeline,

Job requisitions are translated into the same skills taxonomy used to describe the candidates. Matching is via the SKILLEDJOBS application.

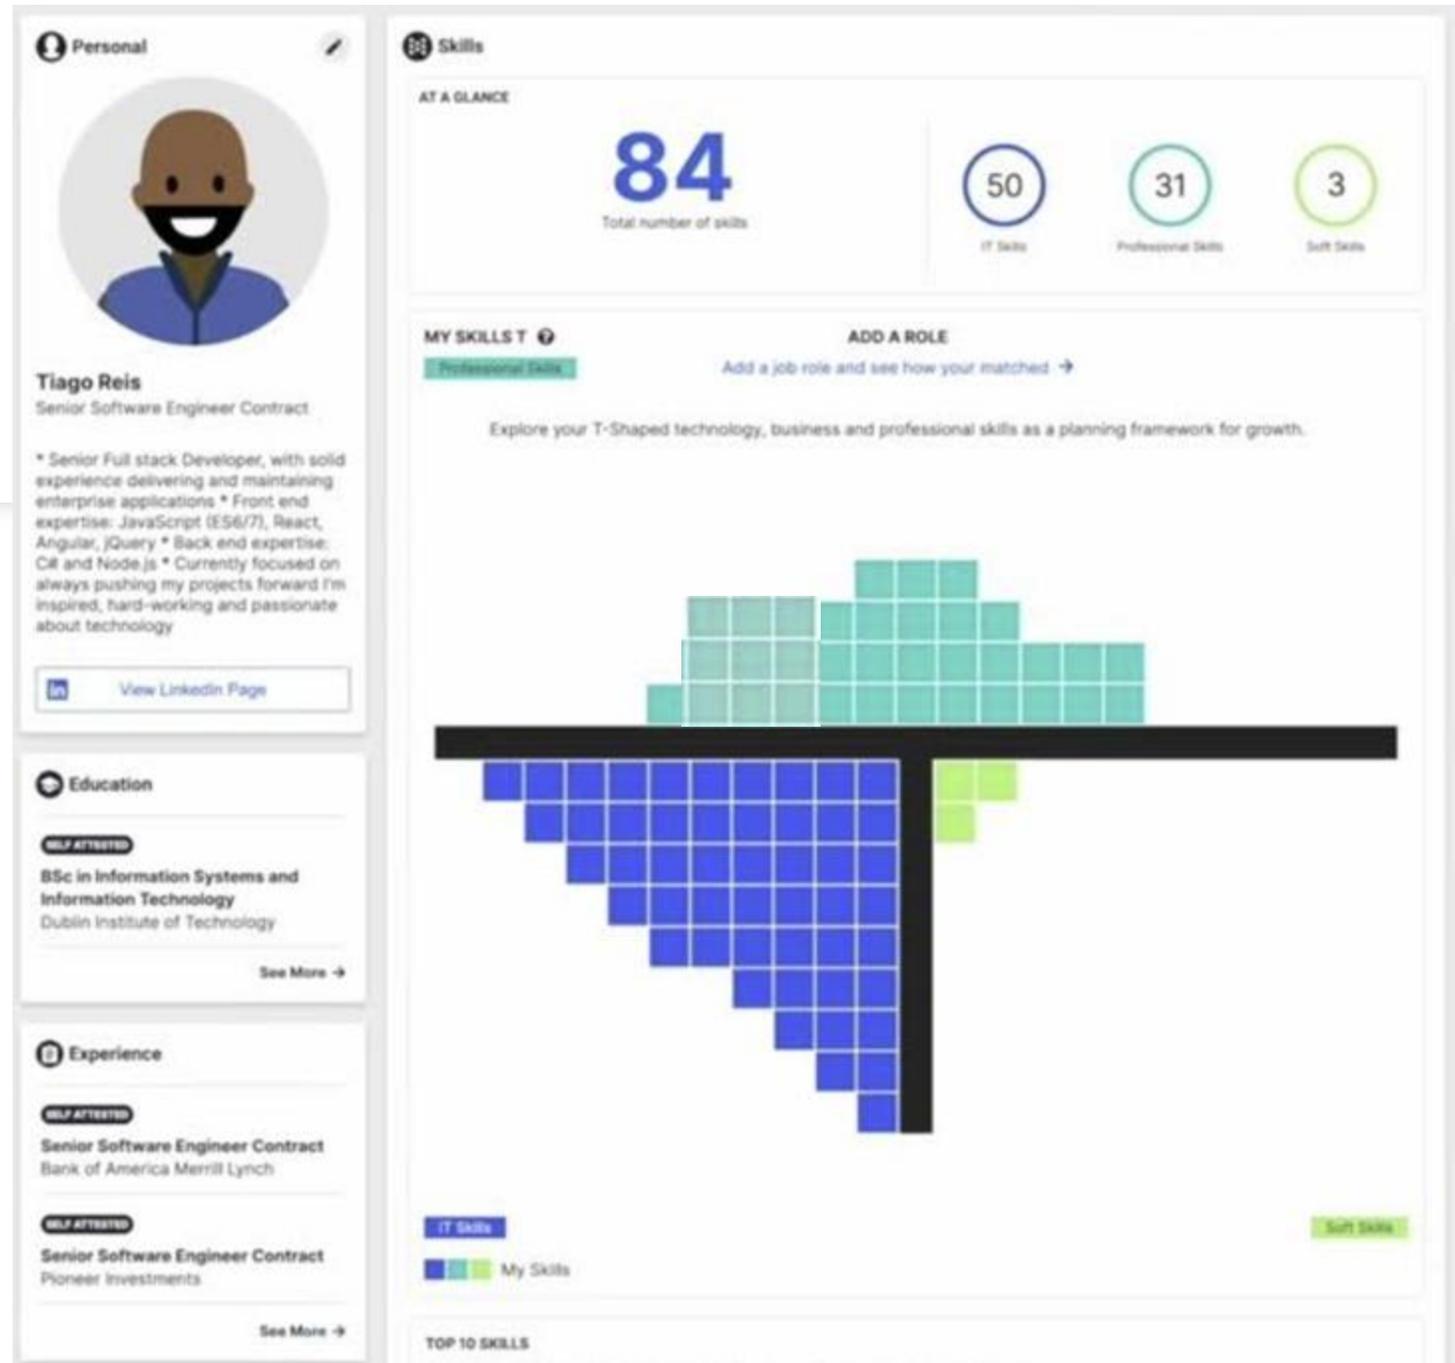

## Wallet Features:

\*Converts transcripts and experience into discrete skills objects (note squares)

\*Reports 3 areas:  
(Professional skills,  
Technical Skills, and Soft skills)

\*Maps to existing jobs as described by employers

\*Gap analysis and remedial training suggestion

# LER Best Practices: Talent Supply Chain

- Use as a feedback loop to augment/update training and education
- Requires employer engagement for maximum benefit
- Scalable: across thousands of graduates and thousands of employers
- Security: Personal Identifiable Information across platforms is critical
- Compatible with credentialing, badging, workforce, range, etc. organizations
- Dashboard reporting to Employer and supporting agency (University, etc.)
- Proper onboarding of student and employer data
- Customizable KPI reporting
- Post-employment career advancement tracking, job changing tracking

# LER Pilot Implementation

- An LER pilot will start in Summer 2025 as part of the National Taskforce for Cybersecurity Workforce Development
- 50 Geographically diverse participants from the CAE community
- Participants will receive:
  - a 45-minute onboarding workshop
  - a digital wallet as a repository of training, academic and professional credentials
  - tools to explore job roles and career pathways
  - access to a portal of live job postings where application can be initiated
  - help in identifying skills gap
